## Abstract of **EP1044673**

Anhydrous composition for application to the skin comprises: (a) surface-stabilized polymer particles dispersed in an oil phase comprising a volatile liquid (I) and a nonvolatile liquid (II), where (II) has a delta h solubility parameter of no more than 5 (J/cm<sup>3</sup>)<sup>1/2</sup> and the (I):(II) weight ratio is 2-25:1; and (b) coloring matter.
